LANGUAGES

Russian

English

I have been in the business sphere since 1990, when I became the chief of accounting of a logistics company, which was founded as one of the first business entities on the basis of the then-adopted Act of the Czecho-Slovak Federative Republic No. 105/1990 coll. on the private business of citizens. I went through the entire development of the legislative environment creation for the functioning of business activities in the former Czechoslovakia and then in Slovakia. In 1992, I founded my own company, which provided comprehensive services for entrepreneurs "from the establishment to the liquidation of companies" and which I am a CEO to do to this day. I therefore have rich experience in various areas of the business sphere that is in itself a guarantee of quality.
